

The **Decoder RDM4** features 4 channels and 5A per channel. It is compatible with our DMX controllers to provide dimming and color changing effects for RGB, RGBW, and Tunable White LED packages. RDM facilitates remote device management of reading and writing DMX addresses, and supports bi-directional communication, for easier installation and commissioning. With an on board digital display and built in hardware, XLR and Ethernet connection ports, installers can simply connect, set, and play.

Product Detail

Electrical	Input Voltage	12-48VDC
	Max Input	20A
	Max Power	4x(60-180)W@12-36VDC, 4x120W@48VDC
	Connection Type	Push-in Terminal
	Max Output Current	5A/CH
Mechanical	Protocol	PWM
	Housing Construction	PVC
	Mounting	DIN rail
	Weight	0.25lb (115g)
Environmental	Environmental	IP20
	Operating Temperature	-4°F to 122°F (-20°C to 50°C)
	Certifications	cURus, CE, FCC, RoHS
