

The BL controls Decoder RDM5 features 8 amps, and 5 channels, and is compatible with our DMX controllers to provide dimming and color changing effects for RGB, RGBW, and Tunable White LED packages. RDM facilitates remote device management of reading and writing DMX addresses, and supports bi-directional communication, for easier installation and commissioning. With an on board digital display and built in hardware, XLR and Ethernet connection ports, installers can simply connect, set, and play.

Product Detail

Electrical	Input Voltage	12-24VDC
	Max Input	5A (x4)
	Max Power	120W (x4)
Mechanical	Connection Type	Screw Terminals 3 Pins XLR terminal 2xRJ45 Terminal
	Max Output Current	8A/CH
	Housing Construction	Aluminum
Environmental	Weight	0.54lb (247g)
	Environmental	IP20
	Certifications	UR
	Operating Temperature	-4°F to 122°F (-20°C to 50°C)
