

# S2308

BL Fixform

Flexible Surface Mount Aluminum Extrusion  
Designed for use with **BL Flexform** Series

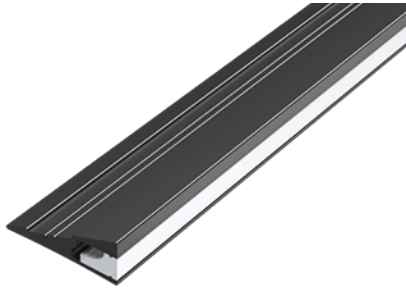

S2308 is a linear lighting solution featuring a surface-mounted black aluminum profile with a silicone optical diffuser, providing bright and uniform illumination. With an ultra-slim 0.31 in (8 mm) profile, it is ideal for space-constrained modern interior applications. It is well suited for indirect lighting, allowing concealed installation at the bottom of cabinetry to create soft, glare-free ambient lighting through reflection, enhancing spatial depth and atmosphere. Designed for BL Flexform integration, it has a total width of 0.89 in (22.7 mm) for seamless surface mounting.

Solid State Lighting is sensitive to power fluctuations. Surge protection is highly recommended for all LED lighting products and should be on a dedicated circuit to protect against premature failure. Lack of surge protection may void your warranty.

Designed & Assembled in North America.

Specifications subject to change without notice. Please refer to our website at bllighting.com for current technical data.
